Planning for Success in Teacher Education

Most students begin their work in the Education Department by enrolling in their
second or third semester at WWC in the EDU 215 Classroom Observations K-12 class.
Any student interested in discussing a possible place in the program is welcome to visit
Carson Hall for information and advising. Once they complete a “Preliminary
Application to the Teacher Education Program,” (Education Department forms are
available on the department’s web page: www.warren-wilson.edu/~education
and in the
Carson Education Office), students are assigned an Education Department advisor and
their progress is guided and monitored. Students who pursue a secondary teaching
license have two advisors, one in their academic field and one in the Education
Department. Students and their advisors create a plan for their completion of the major
and all other college and program requirements in the necessary number of semesters.

Formal admission to the Teacher Education Program is required for the senior-
level Education Department Courses.

You can find an outline of a Typical Elementary Education 4-Year Plan

http://www.warren-wilson.edu/~education/ncate/forms.shtml

..as well as advising information.

A typical Secondary Licensing Program 4-Year Plan can also be found, with
advising information, at

http://www.warren-wilson.edu/~education/ncate/forms.shtml

Please note that the secondary licensure program is a second major, but that it can only
be earned in conjunction with a major such as in biology, chemistry, English, art,
history & political science, or math. Other majors can also support this minor IF it is
possible observe and teach this academic subject in a secondary school.

Interested in a MINOR in education: Students with a major in English, History, Math,
or the Sciences – or other academic area appropriate to secondary education – may earn a
minor by completing all the requirements with the exception of EDU 408 Student
Teaching.
